**LET'S
TALK
TRAINING**

WELCOME TO EVOST 'BORN FROM EXPERIENCE'

At Evost, we are unwavering in our commitment to delivering the finest fitness equipment, meticulously crafted to combine durability with unparalleled performance. From cutting edge strength training machines to precision-engineered accessories, every product we offer reflects our dedication to quality and innovation. Whether you're outfitting a corporate gym, hotel fitness center, health club, residential complex, or commercial facility, Evost is your trusted partner in building exceptional fitness environments. We understand the unique demands of each space, and we deliver solutions that not only meet but exceed expectations.

If you seek to elevate your fitness facility with equipment that is reliable as it is revolutionary, look no further than Evost where excellence in design and performance comes standard.

Why choose Evost :

- **Premium Quality :** We use only the best material and components to ensure that our fitness equipment is build to last. We test each product rigorously to ensure that it meet our high standards of quality.
- **Innovative Design:** Discover the forefront of the fitness innovation with our team of engineers and designers who continuously push boundaries. We are dedicated to crafting products that are not only unique and effective but also enjoyable to use while exuding a class of modernity.
- **Expert craftsmanship:** Our manufacturing process is second to none. We employ skilled craftsmen who take great pride in their work, and who are committed to producing equipment of the highest quality.
- **Outstanding customer Service:** We believe that our customer deserve the best possible experience when they choose Evost .

In addition to equipment, we also provide gym design and layout services to help business optimise their space and create a safe and effective workout environment.

With more than 25 years of fitness research, Evost design has produced a coordinated and stylish family of products, covering all exercise spectrums & making strength training more enjoyable and effective for everyone.

Browse our selection today and experience the difference that we give!

“OVER 25 YEARS STRONG”

***BOOST YOUR STRENGTH AND BUSINESS WITH OUR
INNOVATIVE STRENGTH SERIES - TAKING TRAINING
AND SUCCESS TO THE NEXT LEVEL***

***If you can dream it,
We can build it !!***

TITAN – XTREME SERIES BLENDS POWER , PERFORMANCE AND ENDURANCE

The **TITAN XTREME Series** reigns as the pinnacle of plate-loaded equipment, establishing a new benchmark for strength, durability, and performance. Engineered with meticulous precision, it offers exceptional stability and a commanding presence, built to withstand the most intense training sessions. Designed to enhance every workout, the **TITAN XTREME Series** guarantees unparalleled power, unmatched versatility, and flawless precision. Whether you're pushing for personal bests or striving for consistent gains, this series is the ultimate choice for those committed to serious, high-performance training.

Features Overview:

- **Superior Stability and Durability:** Constructed with the largest 200*88 tubing in the market, offering unparalleled stability, durability, and visual impact.
- **Ergonomic Designs:** Advanced ergonomic designs ensure comfort and optimal muscle engagement for every workout.
- **Multi-Link Structure :** Enhances biomechanical efficiency, ensuring precise and smooth movements and consistent weight output during training.
- **Independent movement :** independent movement allow for both unilateral and bilateral exercises, increasing versatility and promoting balanced muscle development.

“Unmatched power and stability for ultimate strength and performance”

GOLD

Multi. Link. Structure.

TITAN GOLD SERIES- REVOLUTIONARY DESIGN, UNMATCHED PERFORMANCE

The **TITAN GOLD STRENGTH SERIES** sets a groundbreaking standard in plate-loaded equipment, combining advanced engineering with innovative design. Featuring a cutting-edge multi-link system, it offers a smooth and seamless range of motion, ensuring optimal muscle engagement and reduced strain. Built for unmatched durability and performance, this series delivers exceptional versatility, allowing for personalized workouts. Whether you're a beginner or seasoned athlete, the **TITAN GOLD SERIES** provides an immersive, high-performance training experience, helping you achieve maximum results and elevate your fitness journey to new heights.

Features Overview:

- **Consistent Resistance Curve:** Provides stable and uniform resistance throughout the entire range of motion, ensuring more efficient workouts.
- **Enhanced Training Effectiveness:** The more stable resistance curve makes workouts more comprehensive and effective, helping users achieve their fitness goals faster.
- **Optimized Biomechanical Design:** Mimics the natural movement trajectory of the human body, reducing stress on joints and soft tissues, thereby enhancing safety.

“Redefining strength with cutting-edge precision”

iWon-PRO A-7000 SERIES: DRIVEN BY EXCELLENCE

i-Won PRO SERIES features the EVOST A 7000 a premium selectorized collection that combines advanced technologically with expert insights from leading fitness professionals. Its emotive colour, sinuous curving profile and striking aesthetics create a cohesive, elegant look across the entire range.

Design for durability and performance, EVOST meets the demands of clubs seeking top-tier, long-lasting equipment.

Features Overview:

- A robust and durable 137 x 40 mm rectangular steel tube with 3mm thickness, engineered for superior structural integrity.
- Isolateral Technology: Each arm moves independently, providing a balanced workout and reducing the risk of the muscle imbalance.
- Aluminium cover, wide housing with CRC sheet laser cut steel cover, installed with belt & cable drive to ensure ultra smooth operation.
- Chrome plated guides, paired with composite steel weight plates processed with a nano-ceramic finish & cathophora spray, enhance durability and provide superior resistance to wear and corrosion.
- Weight plates installed with robust rubber suspension bumpers, expertly designed to absorb & minimize shock, ensuring optimal durability and long- term resilience under constant use.
- The abrasive blaster is chemically treated & electrostatically powder-coated ensuring superior adhesion and long lasting durability.
- A Fully automated laser cutting machine designed to efficiently process Q235B steel, ensuring precision and consistency.
- Robotic welding ensures precise welds ensuring flawless biomechanical alignment and structural integrity.
- Alloy processed weight selector pin adapts 304 stainless steel, elegantly finished & corrosion free.
- The Glass reinforced pulley, operating on precision steel ball bearings & coupled with a high- quality turning screw, enhances the overall efficiency of the product.
- Premium quality of Ø 5.8mm nylon-coated cables with an impressive 3600 lb tensile strength, engineered for enhanced durability and extended service life.
- Double-stitched contoured seat pads featuring advanced honeycomb foam technology and integrated lumbar support, to provide exceptional comfort and optimal support during the workout.
- Hydraulic gear switch design ensure that the seat can be easily and precisely adjusted.

“Experience Excellence with Top-Tier iWon-PRO series”

iWon SOLID U-1000 SERIES : DRIVEN BY ENDURANCE

i-Won Solid U 1000 Series represents the pinnacle of premium selectorized design where advanced technology meets exceptional engineering. Crafted for seamless, flawless movement this series combines ergonomic precision with unparalleled durability, ensuring optimal performance in even the most demanding environments.

Boasting a sophisticated, Emotive colour scheme and flowing sinuous curves, the U 1000 exudes elegance and strength. Its striking aesthetic creates a cohesive, modern look across the entire range, harmonizing form with function. With this series, EVOST redefines what it means to deliver both superior performance and aesthetic excellence.

Features Overview:

- A Fully automated laser cutting machine designed to efficiently process Q235B steel, ensuring precision and consistency.
- Robotic welding ensures precise welds ensuring flawless biomechanical alignment and structural integrity.
- The abrasive blaster is chemically treated & electrostatically powder-coated ensuring superior adhesion and long lasting durability.
- Chrome plated guides, paired with composite steel weight plates processed with a nano-ceramic finish & cathophora spray, enhance durability and provide superior resistance to wear and corrosion.
- Weight plates installed with robust rubber suspension bumpers, expertly designed to absorb & minimize shock, ensuring optimal durability and long-term resilience under constant use.
- Alloy processed weight selector pin adapts 304 stainless steel material, elegantly finished & corrosion free.
- The Glass reinforced pulley, operating on precision steel ball bearings & coupled with a high-quality turning screw, enhances the overall efficiency of the product.
- Premium quality of Ø 5.8mm nylon-coated cables with an impressive 3600 lb tensile strength, engineered for enhanced durability and extended service life.
- Double-stitched contoured seat pads featuring advanced honeycomb foam technology and integrated lumbar support, to provide exceptional comfort and optimal support during the workout.
- Hydraulic gear switch design ensure that the seat can be easily and precisely adjusted.

"Step up to Success with unrivalled iWon series"

GALAXY

**Perfection.
Exceptional.
Durable.**

GALAXY SERIES A-3000 : THE PINNACLE OF SINGLE STATION STRENGTH

Galaxy Series A 3000 the next evolution of single station strength training. Seamlessly blending sophistication and durability, this series meets the elevated demands of fitness clubs seeking equipment that exemplifies exclusivity and high performance.

With its dynamic colour palette , flowing colours, and bold, modern aesthetic , the galaxy series offers striking visual appeal that unifies the entire range. Designed not only to enhance the look of any facility, but also to provide a premium training experience, it effortlessly combines form with function ,making it the ideal choice for those who value both style and substance.

Features Overview:

- A robust and durable 110 x 50 mm rectangular steel tube with 3mm thickness, engineered for superior structural integrity.
- A Fully automated laser cutting machine designed to efficiently process Q235B steel, ensuring precision and consistency.
- Robotic welding ensures precise welds ensuring flawless biomechanical alignment and structural integrity.
- The abrasive blaster is chemically treated & electrostatically powder-coated ensuring superior adhesion and long lasting durability.
- Chrome plated guides, paired with composite steel weight plates processed with a nano-ceramic finish & cathophora spray, enhance durability and provide superior resistance to wear and corrosion.

TASICAL 

**Priced Right.
Built Tight.**

TASICAL-X N-3000 SERIES PRICED RIGHT !! BUILD TIGHT !!

The **Tasical-X N-3000 Series** Strength Line fuses raw power, exceptional durability, and cut-edging innovation in every machine. Meticulously engineered for optimal performance, it offers unmatched strength and resilience while showcasing a sleek, modern design. Affordable without compromising on quality, the X-Series ensures comfort, efficiency, and longevity, making it the ideal choice for strength training, endurance, or rehabilitation.

Features Overview:

- Durable and innovative 100 x 50 mm rectangular steel tube with 3mm thickness for maximum structural integrity.
- Robotic welding ensures precise welds ensuring flawless biomechanical alignment and structural integrity.
- The abrasive blaster is chemically treated & electrostatically powder-coated ensuring superior adhesion and long lasting durability.
- A Fully automated laser cutting machine designed to efficiently process Q235B steel, ensuring precision and consistency.
- Weight plates walled with heavy rubber suspension bumper used to absorb & reduce shock to make it endurable for long term use.
- Alloy processed weight selector pin adapts 304 stainless steel material, elegantly finished & corrosion free.
- The Glass reinforced pulley, operating on precision steel ball bearings & coupled with a high- quality turning screw, enhances the overall efficiency of the product.
- Premium quality of Ø 5.8mm nylon-coated cables with an impressive 3600 lb tensile strength, engineered for enhanced durability and extended service life.
- Double stitched contoured seat pads with honeycomb foam technology with lumbar support for a comfortable and well supported workout.
- The manual gear shift design allows for effortless and precise seat adjustments, ensuring optimal customization.
- Chrome plated guides, paired with composite steel weight plates processed with a nano-ceramic finish & cathophora spray, enhance durability and provide superior resistance to wear and corrosion.

PLATE LOADED SM SERIES : PRECISION , POWER AND ENDURANCE

The SM Plate loaded series offers a powerful blend of durability and versatility , designed to enhance your strength training experience. Engineered for precision and ease of use, the series allows for customized workouts with smooth regulated movements, ensuring optimal performance and efficiency for all fitness levels .Built to withstand intense training sessions it delivers consistent results, making it ideal choice for both beginners and seasoned athletes.

Distinctive in both form and function, experience the perfect balance of strength, safety, and performance with every workout.

Features Overview:

- The Plate-loaded design enables precise adjustment of weight and workout intensity allowing targeted focus on specific muscle groups.
- Isolateral Technology allows each arm to move independently, ensuring a balanced workout while minimizing the risk of muscle imbalances.
- The adjustable range of motion enables users to customize the exercise to their specific needs and goals.
- Heavy-duty construction, crafted from high quality steel with a resilient powder coated finish, ensures these machines can endure the demands of a commercial gym environment.
- Ergonomically designed for maximum comfort, these machine feature padded seats and backrests, adjustable footrests, and contoured handles, ensuring a safe and comfortable workout experience .
- Plate loaded machines are typically easy to use, with clear instructions and intuitive controls, making them accessible to users of all fitness levels.
- A fully automated laser cutting machine designed to precisely process Q235B material.
- Robotic welding with nano-ceramic technology on the surface creates a protective layer while ensuring precise welds for flawless biomechanical alignment.

PLATE LOADED D-600/ A-600 SERIES : PERFORMANCE WITHOUT COMPROMISE

The D and A plate loaded series deliver a dynamic fusion of robust durability and exceptional versatility, transforming your strength training routine. Masterfully engineered for unmatched durability and performance, these series redefine versatility with smooth, controlled movements and customizable intensity. Built to endure the most intense workouts, they deliver extraordinary results, setting a new standard for precision, power, and efficiency.

Distinctive in both form and function, our Plate Loaded series stands above the rest, ensuring that every training session pushes you closer to your ultimate finish goals with unmatched effectiveness.

Features Overview:

- The Plate-loaded design enables precise adjustment of weight and workout intensity allowing targeted focus on specific muscle groups.
- Isolateral Technology allows each arm to move independently, ensuring a balanced workout while minimizing the risk of muscle imbalances.
- The adjustable range of motion enables users to customize the exercise to their specific needs and goals.
- Heavy-duty construction, crafted from high quality steel with a resilient powder coated finish, ensures these machines can endure the demands of a commercial gym environment.
- Ergonomically designed for maximum comfort, these machines feature padded seats and backrests, adjustable footrests, and contoured handles, ensuring a safe and comfortable workout experience.
- Plate loaded machines are typically easy to use, with clear instructions and intuitive controls, making them accessible to users of all fitness levels.
- A fully automated laser cutting machine designed to precisely process Q235B material.
- Robotic welding with nano-ceramic technology on the surface creates a protective layer while ensuring precise welds for flawless biomechanical alignment.
